

ANCHOR — packing a fixed-size suitcase

SKELETON — and THREAD-B dissolving (the gate working)

Teal = theory’s voice / a concern dissolving: THREAD-B is drawn resolving, not flagged — the bounded- M_t vs unbounded- Ω asymmetry is correctly absorbed into sufficiency/fitness, and the relocation is named in-text. Candidate $\rightarrow$ §B.1 (burden-of-proof gate working). The defect class is unnamed relocation; here it is named.
