

caveated component inputs

unity dimensions
closure rate-distortion

linear-Gaussian / metric caveats

shared intent
IB compression

encoder + relevance caveats

Auftragstaktik
bandwidth priority

marginal + regime caveats

communication gain
trust denominator

common-scale + strategic caveats

chapter synthesis
bandwidth + trust layer

audit rule: synthesis can organize caveats, not erase them

Ch.2 closure machinery
made actionable

Ch.4/5 coupling
given trust variables

AI/team prescriptions
testable only with assumptions
