

conditional component lanes

signed coupling
one disturbance ledger

requires units, floors, assumptions

recipient regimes
repair router

repair mapping must match source

tempo exponents
2, 3/2, limits

$\alpha = \mathcal{T}$, noise model, simulations

contraction boundary
handoff to games

scope method, not all game dynamics

chapter-end synthesis
cooperative/adversarial

audit rule: synthesis preserves caveats; it does not upgrade them

watch: observation noise can gate attacks and degrade defense

operational claims
repairs, OODA, noise

Ch.5 hand-off
equilibrium machinery
